

adi.lec 280

## Simply strong: Easy handling even under heavy load

Gudrun (51), Aachen

“The adi.lec 280 is extremely robust and hasn't 'broken down' any of our heavy residents yet. It can be adjusted as easily as any other of our beds”.

The positioning and care of heavy weight people places high demands on professional caregivers - and is usually also associated with special challenges for the person in need of care.

With our **highly resistant nursing care bed** adi.lec 280 we can offer a robust solution for obese people with a **person weight of up to 280 kg**, that combines comfort and safety with a maximum degree of functionality.

Thanks to powerful motors, the lying surface can be easily adjusted, and **special lifting columns** enable a **quick and uncomplicated height adjustment** from 40 - 80 cm. Torsion-free and particularly stable side rails ensure safety even with high positioning. A **safe working load of an enormous 315 kg** also ensures that the adi.lec 280 is ideally equipped for almost any care situation. Strong arguments for our strongest bed!
