## Comprehensive comfort: The popular nursing care bed with many advantages

Holger (32), Cologne

“The integrated, tool-free bed and side rail extension is a striking feature - here, someone really had some great ideas. And our residents also love ‘their’ practico alu plus”!

The **practico alu plus** is a **versatile low bed** that you do not want to miss anymore after just a short time: This does not only apply to caregivers who appreciate its **functionality and ergonomics**, but also to satisfied residents who are highly content with the cosy design and the high lying comfort.

This is further increased by the 860 mm **long back section**, as it enables a particularly ergonomic upper body position as well as a **reduction of pressure peaks**.

Further clear advantages are the **integrated, tool-free bed extension** and the **telescopic side rails**, which can easily be extended to 210 cm and 220 cm - in no time at all.

Details that make **practico alu plus** the first choice for many care professionals when it comes to flexible, future-proof and high-quality equipment for rehabilitation or care facilities.
